

Ultimate JL Bracket Install Guide

2018 - Present Jeep Wrangler JL and JLU

Thank you for purchasing the ultimate Jeep Bracket from Five Hundred Stones, LLC. We have custom designed this bracket to exactly fit the Jeep Wrangler JL 2dr or 4dr (years 2018- Present).

This mounts inside the spare tire well using new extended lug nuts (supplied). This bracket is constructed out of sturdy, American, cold-rolled steel covered in a durable textured powder coating. This is proudly made in America!

Supplied Parts:

	Description	Part Number	Quantity
A.	Full Bracket	JLRLB	1
B.	Extended Lugs for Mounting	RLBEL	2
B1.	Spline Lug Nuts (14x1.5)	RLSLN	2
C.	Bolt for fastening bracket to lugs	RLBSB	2
D.	Screws to attach 3rd light to bracket	RBLBS	2
E.	Bolt for license plate frame	RLBLPB	2
F.	Washer to space between nut and bracket at the license plate	RBLLPW	2
G	Nylon Lock Nut to attach license plate	RLBLPN	2

3rd Brake light relocation

Prepare stock 3rd brake light

1. Remove the spare tire.
2. Remove the 7 T25 Torx bolts circled here in red:

3. Fold over the cover to expose the 3rd brake light wiring and 2 additional T25 Torx bolts...remove these bolts circled in red here:

Ultimate JL Bracket Install Guide

2018 - Present Jeep Wrangler JL and JLU

4. Unplug the harness and the factory 3rd brake light should be free from the assembly
5. There is a great video on this at: <https://youtu.be/0WfynwmVSrU>

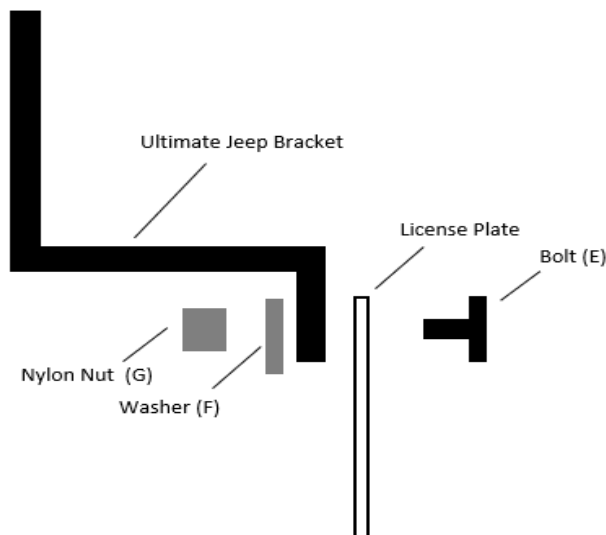

Bracket installation

It is easiest to install your 3rd brake light on the bracket prior to attaching the bracket to the vehicle

1. Place the spare tire on the tire carrier
2. Attach the spare tire using the supplied spline nuts(B). This will be easiest using a spline tool (not included) torque the lugs to factory specs. Attach the extended lugs (B1) to the mounted spline lug nuts.
3. Using the supplied large blackoxide bolts (C), mount the bracket to the extended lugs. Tighten this using a 22mm socket.
4. Plug your factory 3rd brake light wiring harness into the 3rd brake light

License Plate Relocation

1. Remove your license plate from the factory location
2. Attach your license plate to the Ultimate Jeep Bracket

Rear-Facing Offroad Lights

1. Add the offroad lights of your choice....use quick disconnects to ensure easy removal of the rear tire if needed.
2. If you ARE using the 3rd brake light on the bracket, you should purchase 3" cube or round lights.....any larger, and it will interfere with the 3rd brake light.
